

PH TRANSMITTER WITHOUT DISPLAY

Special Features:

- Low Cost OEM Series
- Wide Temperature Range
- Glass with Plastic Construction
- Compact Version
- Surge Protection
- Over Voltage Protection

Description:

PH1001 PH Transmitter is one easy to use wall mounting transmitter for continuous monitor. Available without and optionally, with LCD display the meter can display the PH of your solution together with a very high accuracy. With Internal temperature compensation, PH1001 delivers fast and high accuracy. Precision pH transmitter immediately detects changes in solution pH. With a 230V AC power supply, This instrument features BNC composite electrode making it easier in the world to facilitate the replacement of used electrodes.

Performance Specifications:

pH Range	: 0 - 14
Accuracy	: $\pm 0.5\%$
Operating Temp.	: - 20°C to 70°C
Storage Temp.	: - 30°C to 85°C
Power Supply	: 230V AC
Electrode Connection	: BNC Pins
Electrode Type	: mV
Output	: 4-20 mA, 2 Wire
Enclosure	: ABS Moulded Housing
Mounting	: DIN Rail Mounting
Calibration	: pH4 and pH 7 Calibration
