

Soil pH / RH / Temperature / Light Intensity

⚙ Applications:

- Omicron E0021 is the latest device in soil quality measurement. It mainly tests the soil pH, moisture, humidity, temperature and light intensity of plants.
- Power 1x9v Battery
- Probe length : 200 mm
- Display : LCD
- Low power indicator , and automatic power off if no use within 5 minutes
- This instrument applies to flowers and grass planting, landscaping.
- Backlight : Yes
- Size : 122mm x 36mm x 63mm

⚙ Specification:

Model	: E0021
Parameters	: Soil pH / RH / Temperature / Light Intensity
Range	: 0 to 14 / 0 to 100% / -40 to 100°C
Accuracy	: 2% of F.S
Display	: Backlit LCD
Power	: 9V Battery
