## Techsense Bangladesh Ltd

## Cam Switch (Single-position mechanical), Code : BNS0003

Mechanical position switches are the classics of automation. The switching process is carried out by a telescopic ram. This ram is used to connect a mechanical switching element in a separate sealed chamber. The optimal choice of ram shape for the application in combination with our cams guarantees a long service life.

## General Attributes

- Dimension
- Connection type
- Reproducibility
- Switching rate

■ Operating voltage Ue

- Ambient temperature
- Protection type
- Housing material
- Switch actuation force
- Switching element
- Version
- Approval/Conformity
- Continuous current
- Connection type
- Operating principle
- Approach speed
: $74 \times 28 \times 61 \mathrm{~mm}$
: 1. Switch position:Screw terminal
$: 1$. Switch position: $\pm 0.002 \mathrm{~mm}$
: 1. Switch position: 300/min
: 1. Switch position: 250 V AC
: $-5 . . .85^{\circ} \mathrm{C}$
: IEC 60529 IP67
: Aluminum
: 1. Switch position: 20 N
: 1. Switch position: BSE 30.0
: Snap contact
: CE, CCC
: 1. Switch position: 6 A
: 1. Switch position: Screw terminal
: 1. Switch position: Mechanical
: 1. Switch position: $40 \mathrm{~m} / \mathrm{min}$

## Application Notes

- To suit various mounting and fixing methods.
$\boxtimes$ Switch can be directly mounted on back plate for rear mounting
$\boxtimes$ in building control panels and consoles
® Cam switches allow control of processes and utilities in industry and buildings and direct control for simple machines.

BSE 30.0
