

## **Techsense Bangladesh Ltd**

## **INDICATOR WITH VOLTMETER Code: AD22-22VM**

The voltmeter is an instrument used to measure the potential voltage between two points of a given circuit. There are different types of voltmeters because the DC currents have a constant voltage and the AC currents have a variable voltage.

## **General Attributes**

■ Colour : Green, Red, Yellow, Blue

■ Measuring range : 60 ~ 500Vac
■ Operating Frequency : 50 / 60hz
■ Power : 3W
■ Degree of protection : IP65

■ Useful Vita : 50,000 hours

■ Hole to fit the panel : 22mm■ Material : Plastic■ Reference standards : IEC60947

■ CE Certification

## **Application Notes**
