

INDICATOR WITH VOLTMETER Code : AD22-22VM

The voltmeter is an instrument used to measure the potential voltage between two points of a given circuit. There are different types of voltmeters because the DC currents have a constant voltage and the AC currents have a variable voltage.

General Attributes

- Colour : Green, Red, Yellow, Blue
- Measuring range : 60 ~ 500Vac
- Operating Frequency : 50 / 60hz
- Power : 3W
- Degree of protection : IP65
- Useful Vita : 50,000 hours
- Hole to fit the panel : 22mm
- Material : Plastic
- Reference standards : IEC60947
- CE Certification

Application Notes
