## Limit Switch, Code : CSA-003

A limit switch is an electromechanical device that consists of an actuator mechanically linked to a set of contacts. When an object comes into contact with the actuator, the device operates the contacts to make or break an electrical connection. They are used for controlling machinery as part of a control system. CSA-003 has a Strong metal outer shell with swing arm max. $\pm 95^{\circ}$, a Stainless steel idler wheel with punch and spring and a Standard size configuration of M18×1.5 for conduit connector
