

Limit Switch, Code : TZ-6004

A limit switch is an electromechanical device that consists of an actuator mechanically linked to a set of contacts. CWLD is a Double-circuit type of limit switch which is widely used as it has a strong aluminum cast outer shell with high mechanical strength. It possesses a structure of preventing oil, water and pressure. As it has an indicating plate with setting position is installed in it, so it is easy to maintain. It's Built-in contact stand has double-spring, so it has long mechanical life. It also has a standard size configuration of M20x1.5 for conduit connector.

General Attributes

- Operating Force (Max.) : 570g
- Release Force (Min.) : 170g
- Pre Travel (Max.) : 4mm
- Over Travel (Min.) : 6mm
- Movement Differential (Max.) : 0.4mm

Application Notes

- Sealed limit switch is used in machine tool.
- To indicate end of travel on a palletizer.
- In material handling.
- For positioning in a fill operation.
